MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

Canadian fashion mogul Peter Nygard will face sexual assault-related charges in Winnipeg, police said on Tuesday reports the [CBC](#).

The offences were allegedly committed in November 1993 and involve a victim who was then 20 years old, a news release from the Winnipeg Police Service says.

Nygard had victims from Toronto, Quebec and other countries including Nassau, Bahamas where he also faces or faced charges. He owned a private island in Nassau similar to Jeffrey Epstein.

Many of his victims were [Melanin](#) women from all over the world, particularly the Caribbean islands.

He, like Jeff Epstein, had his own island conducting breeding farms and organ transplant operations. The breeding farms included allegedly impregnating women and harvesting organs for eternal youth.

The Pamper Parties

With a laboratory similar to the deceased convicted sex offender Jeffrey Epstein, Nygard would solicit and invite Melanin women to "pamper parties" where he propositioned them for aborted fetus, umbilical cords and even menstruation fluid. All of which Nygard explains are valuable at high commodity on the "Market". And that Melanin women dominate this market. See video below.

Nygard isn't the only elite with particular fetishes for Melanin. In the United States, Democratic donor Ed Buck, [who in 2021 was convicted by a federal jury of nine felonies](#), including giving methamphetamine to two men who died at his West Hollywood apartment after being injected with the drug, has been sentenced to 30 years in prison, said a spokesperson for the United States Attorney's Office Central District of California.

According to a [2019 indictment](#), Buck "engaged in a pattern of soliciting men to consume drugs that Buck provided and perform sexual acts at Buck's apartment" – a practice described in the document as "party and play."

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

In the [CNN news report](#), the victims were solicited on social media, including a gay dating website, and Buck used a recruiter to scout and proposition men, [prosecutors said](#).

Prosecutors said in a news release that Buck typically targeted people who were destitute, homeless or struggling with drug addiction.

“He exploited the wealth and power balance between them by offering his victims money to use drugs and to let Buck inject them with narcotics,” prosecutors said in the statement.

Buck was 67 at time he was sentenced to 360 months, said spokesperson Ciaran McEvoy. He was found guilty of two counts of distribution of methamphetamine resulting in death, four counts of distribution of methamphetamine, one count of maintaining a drug-involved premises, and two counts of enticement to travel in interstate commerce for prostitution.

The [Advocate reports](#) prosecutors had [tens of thousands of texts, voice mails, and videos](#) that laid out Buck's rampant drug use and his fetish for injecting Black men with hard drugs and then having sex with them, often when they were too high to consent. Some of Buck's victims -- several of whom were homeless and just looking for a place to sleep for the night -- wept on the witness stand and told the jury how Buck would also inject them without their approval, including when they were already unconscious. Buck's racism was also on display to the jury with witnesses recounting his use of slurs and Blackface-type masks.

Buck's defense, led by former O.J. Simpson prosecutor Christopher Darden, had no real argument other than shaming the victims, arguing their drug use and sex work as well as their HIV-positive status were reasons to disbelieve them. It didn't work.

Prosecutors wrote in court papers obtained by the Times that Buck used his position of power to manipulate his victims into participating in his sexual fetishes.

“These fetishes include supplying and personally administering dangerously large doses of narcotics to his victims,” the prosecutors wrote, according to the Times.

In a ritual that twice turned lethal, Buck, who is White, tested how high he could get the men he hired to “party and play,” witnesses testified.

The defense contends all the men were at Buck’s apartment under their own will and did not die from methamphetamine.

"Many of them appeared to be drug addicts by their own admission," said defense lawyer Ludlow B. Creary II. "They were living according to their lifestyle, and Ed Buck did not create their lifestyle."

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

One of his victims kept a journal where he wrote about his grueling experience with Ed Buck. He commented he wanted to end his life but would let Ed Buck do it instead. Please note that Ed Buck was a LGBTQ and animal rights advocate. Many of these events were recorded and filmed most likely for elite clientele where it is reported he isn't the only one with this fetish.

The Los Angeles Times reports, Christopher Darden, [a lawyer for Buck](#), told the jury his client was on trial “for conduct that millions of people engage in.” He dismissed the witnesses against Buck as manipulative escorts and drug abusers who used Buck for his money.

Apparently these "gay Black men" didn't deserve much mercy by an LGBTQ advocate for they were homeless 'drug addicts.' The dangers for a Melanin man is clear.

In regards to rehabilitation, there is very little counseling that offered to rehabilitate these men.

This is how one is treated when disenfranchised. Whether it's Nygard, or Buck there are others. And there is a terribly wrong message from these two stories. The exploitation of the Melanin race. Even by its own.

Organ Harvesting

[Canada](#), has become number one in organ harvesting. Humans are now a business.

From a marketing perspective, citizens are being appealed to show compassion through the post-modern era motto 'give your life to save a life,' through "have a beautiful death" or "dying with dignity." A response to address the "global" crisis of systemic barriers that can lead to poverty, substance abuse, prostitution, crime, inadequate services, employment barriers, [housing](#) to name a few. In addition a response to high level positions that bear upon ones consciousness.

Last year, Kevin Ward, the Mayor of Hyattsville, Maryland, United States was found shot and pronounced dead on January 25, 2022. He leaves behind a husband, two teenage sons, and more than 20,000 mourning residents in his town. The mayor of Hyattsville, Maryland, an urban area outside of Washington, DC, is dead at the age of 44 after committing suicide.

Ward's body was found in a park in McLean, Virginia. The same park that former White House deputy counsel Vince Foster was also found dead, leading to tabloid speculation about Ward's death.

Suicide among LGBTQ youth remains far too common, but people are learning that concerns about mental health extend well into adulthood for LGBTQ people. A study published in the American Journal of Preventive Medicine in November 2021 [found that queer men ages 35 to 64 were at a much higher risk](#) of attempting suicide compared to younger queer men.

Within the Melanin community and across other cultures there is going to be an increase number of deaths by suicide due to many of the above factors. Including identity crisis from trans surgery and the

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

cost of the Big Business of Poverty. We'll be speaking more on this topic. Subscribe to receive notifications.

The way forward in organ harvesting and MAiD with Canada leading as an extension of "we are in this together" is, while waiting for answers, have a beautiful death. While we are at it - consider making a donation to help save lives. Or donate your body to help feed the impoverished, today. Just by the touch of your phone or screen in your own home - help is just a touch away.

This narrative will be pushed throughout schools, churches, community organizations and companies.

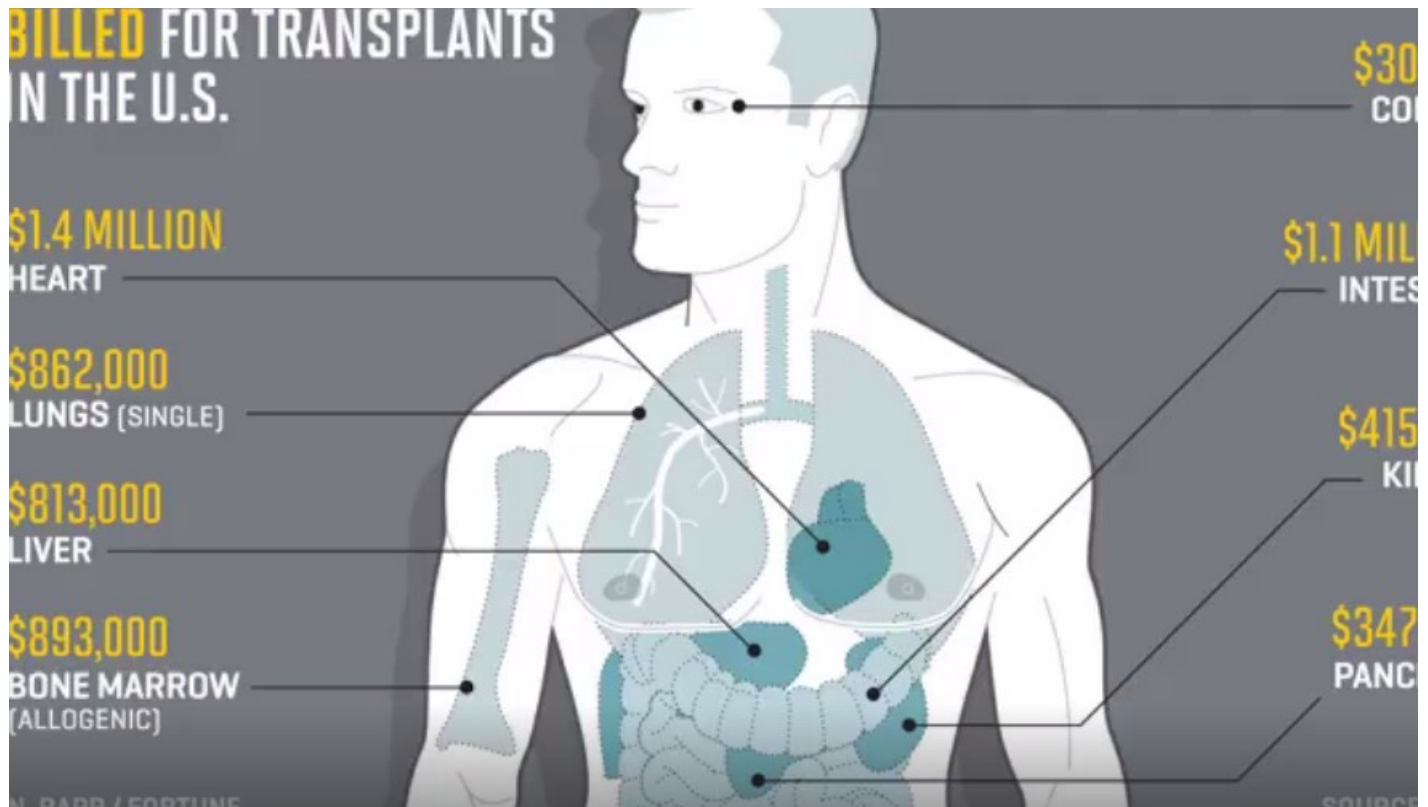

All this and more is coming to a neighborhood and residence near you. As the demand for this industry increases so will the means to accommodate a smooth flow of goods to end users. This will include the use of technology and when possible right from your home or phone. It's already happening. This is going to take Smart Cities to a whole new level. Smart cities plus technology plus medical industry plus Melanin = easy access to a beautiful death, renewable energy, cost efficiency, and sustainable living.

Citizens will have the ability to access any of the services to quickly donate organs or register for MAiD and or donate for human body consumption and or burned in the gas chamber for energy or to be used for other purposes such as beauty products. We'll be addressing this topic also. Subscribe for notifications.

Most of us are chanting Black Lives Matter, or call ourselves Communists or Socialists, Marxist or Nazi, Liberals or Conservatives, Jew, Gentile or Beast. Deciding which pronoun to pick, who to cancel, what gender we are, what the Desperate Housewives or Kardashians are up to, which sports team is winning, to raising a family or wanting advancements in our careers, professions and businesses. All the while for the past century we have fought for social engineered rights while being degraded through systemic barriers yet all the while one of our biggest rights is about to be taken over in one of the biggest geo-political-commerce moves ever in modern history. The profiteers? Well you be the judge.

The average human costs over \$1 Million when you factor in all body parts available for organ harvesting. When you incorporate the value of Melanin that value increases.

Yes, humans are worth more dead than alive. It doesn't apply to celebrities anymore. And when you're Melanin you're worth more than gold! Yaas honey!

This translates to one of the cleverest hijacks in human history. Where our community received a dollop out of funding for Black Lives Matter, a slew of LGBT policies, and more rhetoric on why we've got to stick together in anti-black racism initiatives yet soliciting immigrants and third world countries for organs isn't a conflict of interest or a traitorous form of friendship and racism? Exploitation of women, children, LGBTQ and Straight men, substance abusers or the impoverished isn't a conflict of interest?

Well apparently not when business is involved and fulfilling agenda 2030 which includes climate change. Zero-Carbon emissions. Renewable energy, no meat, organ harvesting and advanced technology all courtesy of eumelanin, a friend of Melanin.

We are being factored in for everyone's survival. How is that for diversity and inclusion.

Let's keep teaching race theory, same-sex relations, and block free speech in this post-modern era while scientists, businesses and governments profit from the use of Melanin. Just keep looking at social issues guys as we hire more people from WEF training camps that can implement the processes necessary to ensure profits for elites and stakeholders who are shareholders.

Just sit back and let the technocrats take over. And the 'Black community' accepts the offer with docile compliance decorated with a beautiful death strategy and soon to be marketing it through quite possibly the many recent immigrants from Africa that arrived in Toronto.

The Need For More Journals

With most journals, the leading institutions on organ trafficking are concentrated in Anglo-Saxon countries: four of them in the USA, two of them in Australia, and one in Canada.

Most of the literature is shaped and produced by [Western countries](#). First, 85% of all cited organ trafficking-related articles are concentrated in the USA and UK. Second, while the rest of the leading countries are not Anglo Saxon, they tend to be economically affluent Western democracies—with the exception of South Africa and Turkey. Although such a trend is not unexpected, we find important to point out that countries in Latin America, Africa and Asia that have the highest number of THBOR victims are underrepresented within the current literature.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7246946/>

Ironically, some rich countries that are amongst the primary organ-importers are also shaping the discourse on THBOR, while poor countries—often transit and/or destination areas—are largely underrepresented.

The recent immigrants from Sudan, Uganda and other parts of Africa is an example of this. Migrants seeking refuge from poor countries have no idea the nature of politics surrounding organ and Melanin harvesting.

What does this mean? The populace of Melanin rich countries have very little clue as to what is happening to migrants, refugees and citizens when it comes to the huge business of the Melanin industry.

Migrants are amongst one of the most vulnerable populations for organ trafficking. Many migrants often face poor socio-economic and political conditions in their own countries. However, situations of vulnerability can occur while en route or in host areas, as migrants are exposed to abuse and exploitation by smugglers and opportunists.

Angelina Ireland, pro-life Delta Hospice Society (DHS) president, told LifeSiteNews that Canadian lawmakers have “unleashed Pandora’s Box upon our nation.”

“We have seen Canadians who are not even dying being eligible for state-sanctioned execution,” she said. The website LifeSiteNews writes the [study](#) was published in the *American Journal of Transplantation* in September 2022.

The website goes on to say the journal found Canada is first in organ transplants, or organ donation after euthanasia (ODE) as it is known, from people who obtained assisted suicide.

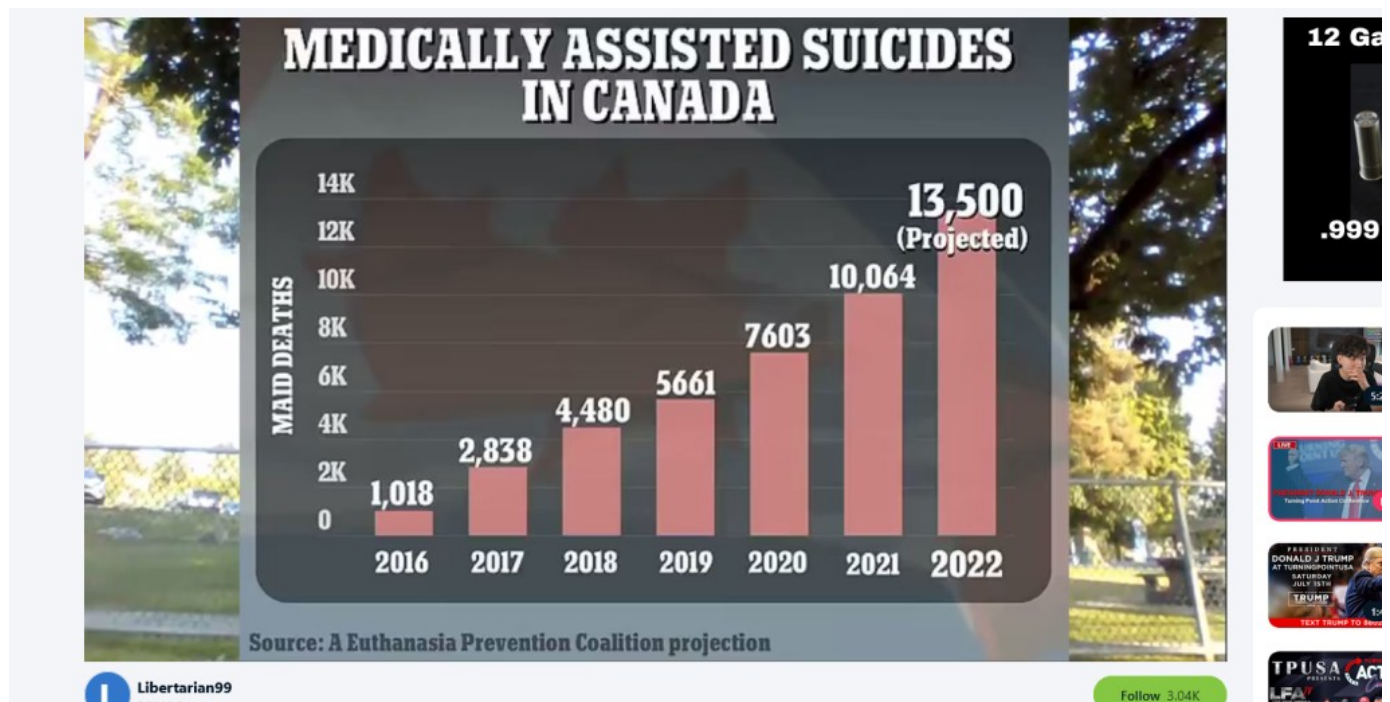

Canada’s increasingly permissive laws have allowed euthanasia to rise 32% since 2020, with more than 10,000 people dying in 2021 alone.

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

"If Canadians are proud of supporting MAiD and other "platitudes sold to them by the woke," they have it upon themselves a "duty to take off the 'rose coloured glasses' and see what has actually been purchased."

"We now must be afraid that the most vulnerable among us will be sacrificed on the altar of 'progressivism.' The poor, homeless, disabled, mentally ill, veterans, minors, unvaxxed, are all at risk," Ireland said.

Ireland said that the only thing that can keep Canadians safe beside the total repeal of Bill C7 and Bill C14 is legislation "protecting Palliative Care for the sick, treatment programs for the broken, economic stimulus for the poor."

"It will certainly take vision and commitment and that is nothing less than what the greatest nation on earth deserves," she told LifeSiteNews.

Regrettably, this is the price to pay to achieve the post-modern era. There is a heavy adamance to stomp out the old and spring up the new for Agenda 2030. These children's fate, what we can do protect them? When this is what it seems the elite want.

Klaus Schwab, founder of the WEF said it - "we have to prepare for an angry world."

The exploitation of the young girls by Nygard, now known as Canada's Jeffrey Epstein is an opening into the lifestyle practices of the elite, our leaders, their networks and intentions. Even though Nygard was arrested and talked about in the media, was he a lone wolf?

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

Before Nygard was arrested he boasted his eternal youth business was about to take off with funding from the federal government. Was his business transferred to the hands of someone else?

Canada, as well many other European, Asian and African countries have tapped into exploitation of the Global Melanin Market Industry.

Scientists and researchers have identified Melanin as a booming industry with huge profits projected for those in the business. You mean Nygard was really onto something? (sarcasm)

From beauty products, to polymers, to bonding materials, to fluorescent light, energy source, elinks and yes organ harvesting, the future we can say is Melanin.

Studies from the [2020 Global Melanin Market Report](#) focuses on the Melanin market size, segment size (mainly covering product type, application, and geography), competitor landscape, recent status, and development trends. Furthermore, the report provides detailed cost analysis, supply chain.

This report claims technological innovation and advancement will further optimize the performance of the product, making it more widely used in downstream applications. Moreover, Consumer behavior analysis and market dynamics (drivers, restraints, opportunities) provides crucial information for knowing the Melanin market.

Who are the key players in this market? The key players in the global melanin market covered are Hairui Chemical, BOC Sciences, and Hubei Xinkang Pharmaceutical Chemical Co., Ltd.

The market covers Pharmaceuticals Beauty Industry Others. The key regions in the global melanin market are:

- North America (United States, Canada and Mexico)
- Europe (Germany, UK, France, Italy, Russia and Turkey etc.)
- Asia-Pacific (China, Japan, Korea, India, Australia, Indonesia, Thailand, Philippines, Malaysia and Vietnam)
- South America (Brazil, Argentina, Columbia etc.)
- Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria and South Africa)

Here are the areas the report covers.

This Melanin Market Research/Analysis Report Contains Answers to your following Questions

- What are the global trends in the Melanin market? Would the market witness an increase or decline in the demand in the coming years?
- What is the estimated demand for different types of products in Melanin? What are the upcoming industry applications and trends for Melanin market?
- What Are Projections of Global Melanin Industry Considering Capacity, Production and Production Value? What Will Be the Estimation of Cost and Profit? What Will Be Market Share, Supply and Consumption? What about Import and Export?

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

- Where will the strategic developments take the industry in the mid to long-term?
- What are the factors contributing to the final price of Melanin? What are the raw materials used for Melanin manufacturing?
- How big is the opportunity for the Melanin market? How will the increasing adoption of Melanin for mining impact the growth rate of the overall market?
- How much is the global Melanin market worth? What was the value of the market In 2020?
- Who are the major players operating in the Melanin market? Which companies are the front runners?
- Which are the recent industry trends that can be implemented to generate additional revenue streams?
- What Should Be Entry Strategies, Countermeasures to Economic Impact, and Marketing Channels for Melanin Industry?

The report also considers the impact of the Russian-Ukraine war. In a [digital journal](#) interview when asked ***does this report consider the impact of COVID-19 and the Russia-Ukraine war on the Melanin market?*** The answer. "Yes. As the COVID-19 and the Russia-Ukraine war are profoundly affecting the global supply chain relationship and raw material price system, we have definitely taken them into consideration throughout the research, and in Chapters, we elaborate at full length on the impact of the pandemic and the war on the Melanin Industry."

This is the description from the Digital Journal website about the industry.

Which are the driving factors of the Melanin market?

Rising Adoption of **[Pharmaceuticals, Beauty Industry, Others]** among Businesses Drives Melanin Market Growth

Based on Product Types the Market is categorized into **[Eumelanin, Pheomelanin, Neuromelanin]** that held the largest Melanin market share In 2022.

Short Description About Melanin Market:

The Global Melanin market is anticipated to rise at a considerable rate during the forecast period, between 2023 and 2028. In 2021, the market is growing at a steady rate and with the rising adoption of strategies by key players, the market is expected to rise over the projected horizon.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Melanin. The market in North America is expected to grow considerably during the forecast period. The high adoption of advanced technology and the presence of large players in this region are likely to create ample growth opportunities for the market.

Europe also plays an important roles in global market, with a magnificent growth in CAGR During the Forecast period 2022-2028.

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

Melanin Market size is projected to reach Multimillion USD by 2028, In comparison to 2022, at unexpected CAGR during 2022-2028.

This report focuses on the Melanin in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Did you get that readers? The market share for Melanin is increasing. But how and where are they sourcing this melanin?

If you've not seen the clip of Nygard soliciting for Melanin, visit letsresetnow.ca and read Melanin Worth More Than Gold.

The next time Canada does another "What it's like to Be Black in Canada," the answer?

Betrayed. Hoodwinked and now hunted for our Melanin.

Should the Melanin community take protective measures regarding Melanin? Yes!

Should elites and clients of Nygard and those involved in these acts be held accountable? Yes!

Should government take real action to ensure Melanin protection rights? Yes!

Should corporations, NGOs, shareholders, stakeholders, trustees, board members, commissions and agencies be held accountable? All together, Yes!

Former Liberal justice minister Irwin Cotler lauded the passage of Bill S-223, saying the “abhorrent practice of organ harvesting has targeted the most vulnerable...” It was Mr. Cotler who 10 years ago first introduced a private member’s bill to combat organ trafficking.

In the Global and Mail article it states S-223, also called the Trafficking in Human Organs Act, has already passed the Senate, where it was sponsored by Sen. Salma Ataullahjan. It bans Canadians from travelling abroad to receive an organ transplant without the informed consent of a donor or someone authorized to give consent. It would make it illegal for Canadians to play any role in unauthorized organ transplants – with a maximum penalty of 14 years in prison.

What does it mean to be Black or any race in Canada with MAiD?

It means “we now must be afraid that the most vulnerable among us will be sacrificed on the altar of ‘progressivism.’ The poor, homeless, disabled, mentally ill, veterans, minors, unvaxxed, are all at risk,” according to Ireland.

“If Canadians are proud of supporting MAiDthey have it upon themselves a “duty to take off the ‘rose coloured glasses’ and see what has actually been purchased” said Ireland.

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

Ireland said that the only thing that can keep Canadians safe beside the total repeal of Bill C7 and Bill C14 is legislation “protecting Palliative Care for the sick, treatment programs for the broken, economic stimulus for the poor.”

“It will certainly take vision and commitment and that is nothing less than what the greatest nation on earth deserves,” she told LifeSiteNews.

The Black Struggle Is No Longer A Social One. It's A Bio One.

Black power is dead. It's all about Melanin Power now!

The so-called "Black" fight is no longer a social one. It's a Bio one.

[Tweet](#)

According to the lawsuit and in the Hive Mind documentary, Nygard procured under age girls with possibly as many as 7,500 victims whose information was found in a database the company's IT department kept. Many of whom where Melanin girls from the Caribbean and other parts of the world. These girls were raped, abused and sodomized. Other girls or women were solicited to recruit other girls or women to his "pamper parties."

While reports of sex trafficking and abuse have been reported by White women, many of his victims included Melanin women for his research into eternal youth and possibly the booming Melanin market. And if you believe the stories going around now about Hollywood elites and [Adrenochorome](#) then this can be included too in their quest for eternal youth.

Many of the girls were violated by other elite guests under the direction of Nygard. Some of the guests have included Oprah Winfrey, Prince Andrew, police officers, members of the PLP party, and others.

Sources have recounted that many of the girls were given drugs at the "pamper parties" and forced to have sex while unable to control their bodies during the violations. Many of whom were under age.

The Lawsuit

156. Nygard's ComCor also uses social media to post about "pamper parties" and direct messages to potential victims that meet Nygard's specifications to invite to "pamper parties." The Nygard Companies' Comcor recruits these victims for Nygard and are paid by the Nygard Companies, with funds routinely routed through New York.

157. Nygard's employees and "girlfriends" are also required to contact potential victims in the database.

Ethics

As mentioned Canada passed a bill to ban "transplant tourism." Where mostly elites travel overseas to receive organ transplants. How many Canadian elites who are leaders participate in this act and where part of Nygard's island's quest for eternal youth program? We may never know.

This, ladies and gentlemen is an important factor why we, who have become a byword to society, who have been prosecuted all these years from slavery, through systemic racism and lack of collective racial accountability need to take the necessary actions now for G-d, self-governance, family, community, and racial protection through [The Melanin Ethics Quality and Standards Bureau](#). This century was all a social construct to damn our souls and divert our attention away from what seems elites are really after. Eternal youth! To achieve that. They need our Melanin or from other valuable sources.

Here at The Reset Society, we have created The Melanin Society and The Melanin Ethics Quality and Standards Bureau to research and develop initiatives that protect Melanin in this new yet already existing industry that is going to be the way of the future.

Yes, the future ladies and gentlemen requires Melanin and lots of it. It has many uses and is called one of the most valuable commodities for the future. Worth more than gold!

What the story about Peter Nygard and Ed Buck reveals is a very important missing link to systemic and institutional racism. Experimentation and exploitation hasn't stopped.

It reveals the elites desire for eternal youth will cause them to commit crimes against humanity. It is one of the bi-products of poverty. This could very well be one of the reasons age old issues of housing, systemic barriers, substance abuse, and human trafficking exist.

The desire for technological advancements and eternal youth has truly opened Pandoras box to medical and political tyranny and exploitation in The New World Order. [Be Heard!](#)

Melanin, More Valuable Than Gold

We were condemned ladies and gentlemen. Our women, as with others of other cultures were raped, abused and sodomized. Our men the same. Families broken apart. We were to mask up in order to survive or eat and take on the European persona to achieve success. Mocked and ridiculed. To be degraded as a "Black" person was our lot. That's what it means to be "Black." It never changed. For degraded we have been treated is what Peter Nygard and Ed Buck's cases expose. Raping and drugging under age women to the point these innocent girls had no control of their body so men and women can abuse them before some were used for organ harvesting. Who does that? Many can say it was only Nygard, but no! The case files says there were other perpetrators.

The disregard for all women, including our own, men and children from these cases brings light on an issue that has existed since slavery. It's the same stories of how they conquered the lands . Rape, abuse, sodomy, breeding farms, human trafficking = Trans Atlantic Slave Trade. From colonization until now. It is our inheritance it seems.

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

While the Dutch and other nations have apologized for their role in slavery, the attacks still exist just packed differently until opened.

Hearing about this case in modern times really rings alarms on what is happening to our race. Beyond the smiles and applauds is the very exploitation that existed since slavery. Even after the apologies the exploitation continues. Our fight is not about pronouns. Our primary fight is not which political party we identify. Nor whether we identify as LGBTQ or Straight. Our fight is about our survival in our everyday skin and those who are out to get it along with internal organs.

Not a lot of people know that even though you can't buy melanin in stores, it holds a dollar value. The cost of melanin is between **\$450 and \$1,150 per gram** which means it is worth more than gold, but also platinum, palladium, or rhodium.

The average human is worth more dead than alive costing over \$1 Million each per person. That number amplifies with Melanin. Yes, melanin can be sourced from many other sources, however Nygard's exposure along with the growing melanin market and Agenda 2030 it paints another picture. A more clearer one!

Many men who transition to women are also at risk for organ harvesting exploitation. The male genitals is known as a top source for stem cells and other medicinal purposes.

Canada recently created a ban on human organ trafficking aka transplant tourism for it knows the elite are doing this. While it is commended this act came to existence it doesn't stop the practice. It only says you cannot bring organs without consent of the donor.

Recommendations

Partners are called on to join our Melania Project initiative. We've discovered a window of opportunity to enhance melanin research and technological advancement's impact on society.

Our first objective is through the Melanin Ethics Quality and Standards Bureau to ensure all parties involved in Melanin research and application adhere to protocols established by our community, our race. Our community should meet immediately regarding this new exploitation affecting all no matter the social status. We have various committees and board positions and are seeking collaborative partners ready for this frontier.

The City of Toronto has property available to community organizations at less than market rate. Our grassroots organization calls on organizations and invite you to join us on this journey in partnership and occupation of this space. This opportunity provides multilevel partnership for community, private and public sector.

This is a huge venture and step for our group and the community at large. We have no idea how this could go. With very little turnaround time to produce a plan with partners and costs the success of landing this space is literally up to the community and partnering organizations involvement. Together, we are taking a bold step towards ethical solutions. Join us on this journey at this time.

The center is located in Toronto with a relatively large space to accommodate many endeavors and will be made available to Veterans, Melanin Indigenous Nations and the surrounding community providing holistic approaches to substance abuse, research and facility, resources, and access to a micro business hub. With the possibility for beds or clinic.

This year, we have seen and spoken with an overwhelming amount of citizens who feel broken, are in need of care, feel attacked or experiencing EMF waves they say is meant to affect their minds and that these attacks are targeted. Many hours are spent speaking with these concerned citizens and we lack the capacity to handle their requests or provide monitored solutions for effectiveness and results.

Partners interested in veterans, mental health, Melanin research, history and heritage, social science, technology, security, law and ethics, biology and [science](#) are invited and called on.

The due date for applying is July 21, 2023. All interested parties requiring further information on requirements and how the Melania Project seeks to service the community and partners are encouraged to contact The Melanin Society. Interested partners and collaborators can contact 1-833-Yes I'm In. That's 1-833-937-4646.

Melanin Power Guide

25 New Immigrant, Organization and Resident Safety Tips

1. Donate to our Melanin Kit. Donate can include clothing, food, water, lights, equipment, jackets, shoes, and other needed items. Lets give our new residents a warm welcome and prepare them for winter. Register with The Reset Community and learn more. Visit our community page to register.
2. Help house a refugee. If you have the space kindly make accommodations for our new guests according to your humane ability. Learn more by contacting us.
3. Food, housing and money may be low but kindly be safe and consider your actions in light of now knowing what is out there. Don't end up like one of Ed Buck's victims.
4. Learn to say no. If you don't feel comfortable walk away. Know who you around and where you are going.
5. Avoid or reduce situations of promiscuity. If you're not putting yourself out there it's easier to stay safe. If you are out there use intuition and don't be naive. Use protection. Always wash.
6. Sleep with caution to avoid predators or ambush.
7. Protect your belongs and identifications. Contact the police by dialing 911 in case of emergencies.
8. If approached for modelling, acting, singing say no. Investigate the company history prior. Although, keep in mind some companies are good at silent exploitation. It's best to avoid these industries all together until their act is cleaned up. Too many incidents of exploitation and human trafficking.
9. Use your phone, laptop, newspaper, or library to research events happening in the city to network and branch out. Libraries provide from 15 minutes to one hour use per person.
10. Share your skills with others. Reach out and let others know what skills you have that can contribute to society. Someone may contact you for work. Or Share what skills you'd like to learn.
11. Avoid going to homes after dark and accepting drinks. If you must accept a drink keep it to water and do what you can to observe the person.
12. Avoid drugs that are offered. Stay sober minded. Today's drugs are beyond and causing another pandemic leading to other issues.
13. Connect with a local church. While many churches today have lost a great deal of trust, you can manage your way there better.
14. Check out a local community centre. They have lots of activities.
15. Pick up a Learning Education guide from the library. It provides courses available for immigrants and new comers.
16. Do not spend time hanging out in communities in masses. Use your time to travel about and learn the city. Ask questions. Meet people. Travel in groups of four at most, two the least. One

MELANIN ETHICS QUALITY AND STANDARDS BUREAU – Melanin worth more than gold

person should be fluent in English of the group. If alone designate a point of contact for emergency.

17. Seek out permanent or temporary employment.
18. Remain in good vibes. Low energy vibrations can attract unwanted energies that are also low vibration. By staying active, keeping a positive outlook, avoiding danger and unnecessary risks, along with eating well when possible can contribute to high vibrational frequencies and balance your aura and chakras.
19. Avoid confrontation and remain calm through agitating situations.
20. Attain an English and or French pocket dictionary and where possible a pocket travel guide or download one to your phone.
21. Organizations can alert immigrants and refugees to the dangers from the story of Ed Buck. It is a call to duty to alert our newcomers for their safety.
22. Organizations can also alert immigrants and refugees on the dangers of organ harvesting and what to do if solicited.
23. If you or someone you know have been solicited you can contact us at The Melanin Society.
24. Volunteer with an organization. Immigrants and refugees along with residents are welcome to become a volunteer with us. Including citizen journalists and citizen scientists and or community officer liaison.
25. Help protect others!

1-833-YES I'M IN!

THAT'S 1-833-937-4646

The information provided in this report are a combination of analysis, review, observation, content from other sources. and a call to action.

SHOP MELANIN - SUPPORT OUR STOP THE BLACK ATTACK CAMPAIGN.
